

To the members of the Ontario Association of Medical Radiation Sciences,

On behalf of my family and the Ontario Liberal Party, I would like to recognize the critical role that the Ontario Association of Medical Radiation Sciences (OAMRS), representing Medical Radiation Technologists (MRT) and Diagnostic Medical Sonographers, continues to play in our province's health care system.

The important services you offer include x-rays, ultrasounds, nuclear medicine, MRIs and radiation therapy. As our health care system has faced immense challenges over the last year, including enormous backlogs, radiation technologists and sonographers have worked incredibly hard to keep us healthy.

This week is Sonography Week and November 7-13 is Medical Radiation Week, where we honour these health care professionals and everything you continue to do.

Thank you to all the Medical Radiation Technologists and Diagnostic Medical Sonographers across Ontario for your dedication to your patients, and for your commitment to providing high quality care across the province.
